

## How can my students progress in DreamBox?

For students to progress in DreamBox Learning, they should focus and complete any NEW lessons that the program has picked for them. The program picks these NEW lessons based on how they have answered their previous lessons, showing DreamBox what the student needs to work on and help build and strengthen their foundation in mathematics.

Students should work on the following types of lessons.

### Intermediate Learning Environment

NEW lesson units will show up on the students MY LESSON'S page with a **GOLD COIN** attached at the bottom left. This indicates that it is a new lesson picked by DreamBox to best progress the student forward along their learning path.

Other lessons will also show up on their MY LESSON'S page, labeled as IN PROGRESS, PRACTICE, and COMPLETE. These should only be worked on if the student needs to strengthen those skills or wants to work on reaching EXEMPLARY status on any of the lessons within the unit. While working on these lessons is a great way to help a student in their understanding of these concepts, they will NOT progress them further along their Learning Path.

\*\*\*\*\*Students should stay focused on any lessons with a **GOLD COIN** attached.\*\*\*\*\*
