

# Game of Speed

Players - 2

Materials - regular deck of cards without jokers

**How to Play:** Deal out 2 cards face down side-by-side in the middle. Place a pile of 5 cards face down next to the 2 middle cards. Deal the remaining cards evenly to each player (face down).

Each player begins with 5 cards in his/her hand.  
*(Be sure you always have 5 cards in your hand throughout the game!)*

To begin, each player flips over a center card. Simultaneously, opposing players place cards either in ascending or descending order according to one of the cards in the middle. For example, if a 7 was one of the middle cards, players could play either a 6 or an 8. The cards can also make a complete cycle, going from a King to an Ace to a 2 or vice-versa. A player can take more cards from his drawing pile during any time; however, a player can have no more than five cards in his hand at any one time. First person to properly lay down all cards wins.

When both players cannot play any of their cards, a card from each replacement pile (the piles of 5 on the outside middle) is turned over and play resumes.
